

ABE ENVIRONMENTAL POLICY

The Association of Business Executives recognises that our work may have a direct or indirect effect on the local, regional and global environment. We are committed to reducing any harmful effects on the environment and promoting the understanding of sustainability in its broadest context.

OUR BELIEFS:

We believe that it is our responsibility to reduce the negative impact our actions have on the environment.

We believe a sustainable business fulfils economic, environmental, and socio-cultural obligations while generating income, contributing to employment, maintaining cultural integrity, and preserving essential ecological processes and biological diversity.

OUR COMMITMENT:

We are committed to taking a pro-active approach to implementing our Green Policy.

This document outlines the objectives we have set for conducting our operations in an environmentally responsible manner:

OBJECTIVES

Waste Management: To reduce the amount of waste generated by reusing & recycling

Paper Consumption: To reduce the use of and dependence on paper

Energy Saving: To reduce the amount of energy consumed by the organisation

Procurement: To purchase wherever possible from environmentally sustainable sources

Travel: To reduce the amount of carbon-producing travel on ABE's behalf

To aid in measuring and achieving this commitment ABE has signed up to the global '10:10' initiative whereby it pledges to reduce its carbon emissions by 10% in a year.
